## SUMMARY

I am a skilled Software Engineer with expertise in Python, TypeScript/JavaScript, with a strong track record of building scalable software systems. I thrive on owning products end-to-end and contributing to business goals by creating efficient, high-performance software solutions. I am seeking software engineering roles that focus on building core systems, where I can take ownership of development projects and make a significant impact on business outcomes.

## EDUCATION

<b>Master of Science – Software Engineering</b>	08/2023 - 05/2025
Arizona State University, Tempe, AZ	4.0/4.0 GPA

## TECHNICAL SKILLS

**Programming Languages:** Python, TypeScript/ JavaScript, SQL, C, C#, HTML/ CSS  
**Web Frameworks:** React.js, Flask, Node.js, Express.js, .NET Core  
**Database Technologies:** PostgreSQL, SQLAlchemy, Entity Framework  
**Tools & Technologies:** Metabase, Docker, Kubernetes, AWS EC2, S3, SQS, Redshift, EMR, Git, PySpark, Pandas

## PROFESSIONAL EXPERIENCE

**Affinity Solutions, Inc. (Remote): Data & Software Engineer** 06/2024 – Present

- Spearheaded the aggregation and delivery of U.S. and U.K. customer transaction data to over 10 major clients—including Bain, McKinsey, and Experian—fulfilling revenue deals exceeding \$10 million
- Automated the generation of weekly data release notes, a task previously done manually for over a year, saving over 5 hours of weekly staff time
- Enriched over 2 billion rows of transaction data received from banks to enhance data usability for clients
- Tools & Technologies: **Python, AWS Redshift, EC2, S3, EMR, PySpark**

**ASU Decision Theater Network (Tempe, AZ): Software Developer, Part Time** 01/2024 – Present

- Building [CuRVE](#)- an interactive, visualization-based tool that enables stakeholders to explore huge datasets and analysis regarding the impacts of Colorado river water shortage in Arizona. CuRVE has over 2000 monthly active users
- Scaffolded codebases for full-stack applications, enabling the team to seamlessly collaborate and accelerate the development of visualization tools used by stakeholders such as the City of Phoenix, etc.
- Tools & Technologies: **Python, Flask, JavaScript, React.js, PostgreSQL, Docker, Kubernetes, Highcharts**

**Omnibiz Africa (Bangalore, India/ Lagos, Nigeria): Software Development Engineer** 05/2021 - 07/2023

- Lead developer in a system rewrite to a **microservices architecture**. Eliminated the use of stored procedures in MS SQL decreasing API response time by 40%
- Developed widgets in our customer facing PWA application to customize the product listing page experience of retailers. Widgets yielded a 60% conversion rate into orders, generating monthly revenue of over \$100K USD
- Created Metabase reports which tracked 100+ important KPIs, enabling product managers to make data driven decisions
- Mentored, reviewed PRs, and managed three new interns, guiding them to produce production-ready code quickly. Managed and owned features end to end within the team
- Tools & Technologies: **JavaScript, React, Python, Azure Message Bus, MS SQL, .NET, C#, Entity Framework, Node.js**

## RELEVANT PROJECTS

**Semantic Web- Disease Predictor, Group Academic Project- [Git Repository Link](#)** Fall 2023

- Integrated and normalized diverse datasets using **Python** into an **OWL-compliant semantic web database** using **Apache Jena Fuseki** and deployed the database on an **AWS EC2 instance**
- Developed and optimized a front-end application powered by **React**, implementing **SPARQL queries** and lifestyle filters, which allowed users to visualize disease patterns for a given lifestyle

## EXTRACURRICULAR ACTIVITIES

- Head of Finance & Tech (2020-2021) for the PES Model United Nations Society. Headed the design & development of our MUN website which received over **1.4K unique visitors** and generated **revenue of 140K Rupees**
